

BERKE ARSLAN

Turkish Attorney · Native Turkish Speaker · AI-Assisted Product Builder

Manisa, Türkiye · mail@berke.cc · berke.cc · github.com/arslanberke

PROFILE

Licensed Turkish attorney (Manisa Bar Association) and native Turkish speaker with a law degree from Istanbul University. Experienced in close reading, precise writing, structured reasoning and factual verification. Builds software products with AI-assisted development: directs AI coding agents, reviews their output, identifies errors and iterates through hands-on testing.

LEGAL EXPERIENCE

Ramazan Aşıklar Law Office, Akhisar

Apr 2026 – Sep 2026

Attorney

- Handled debt enforcement files for a major Turkish bank; drafted petitions in Turkish.
- Researched legislation and case law and summarised findings for case strategy.

Mandatory Bar Traineeship

Dec 2020 – Dec 2021

Trainee Lawyer: 6 months at the courthouse, 6 months at a law office

- Observed hearings and court procedure; reviewed case files and court records.
- Drafted petitions, notices and legal opinions under the supervision of a lawyer.

Oğuz Kara Law Firm

Jul 2019 – Aug 2019

Legal Intern

- Assisted with legal research, document preparation and file organisation.

INDEPENDENT PROJECTS

AI-Assisted Product Development

2025 – present

- Built and shipped five software products with AI coding agents (Devin): SportPulse, Istanbul Routes, LexPulse, TFT Comp Advisor, CoachFlow. Portfolio: berke.cc
- Directed agents through detailed requirements, reviewed results for errors and inconsistencies, and gave corrective feedback until requirements were met.
- Tested every release by hand and checked Turkish and English interface text for accuracy and natural wording.

Technical Automation & Virtualization

2020 – present

- Ran multiple isolated Windows environments with VMware and remote desktop.
- Set up and maintained automated workflows running in parallel across virtual machines.
- Configured proxy-based and isolated network setups for concurrent workloads.
- Diagnosed failures in long-running processes through systematic testing, and monitored CPU, RAM and network usage.
- Solved issues independently using documentation and community resources.
